

Welcome and thank you for attending the Louisiana Workforce Commission/ Office of Workers' Compensation EDI Training - March 27th, 2013

- Time: 2:00PM - 3:30PM EST / 1:00PM - 2:30PM CT

For Claim Administrators, Insurance Companies, Third Party Administrators & Self Insured Entities

Please note that during the training, attendees phones will be muted.

If you have any questions during the presentation, please send an email to LWCEDI@lwc.la.gov. Responses to the questions will be provided during or shortly after the training.

A recorded and PDF version of the training will be posted to lwcledi.info.

THE SCIENCE OF RISKSM

1

Welcome to Louisiana Workforce Commission/ Office of Workers' Compensation EDI Training - March 27th, 2013

For Claim Administrators, Insurance Companies, Third Party Administrators & Self Insured Entities

Please note that during the training, attendees phones will be muted.

If you have any questions during the presentation, please send an email to LWCEDI@lwc.la.gov. Responses to the questions will be provided during or shortly after the training.

A recorded and PDF version of the training will be posted to lwcledi.info.

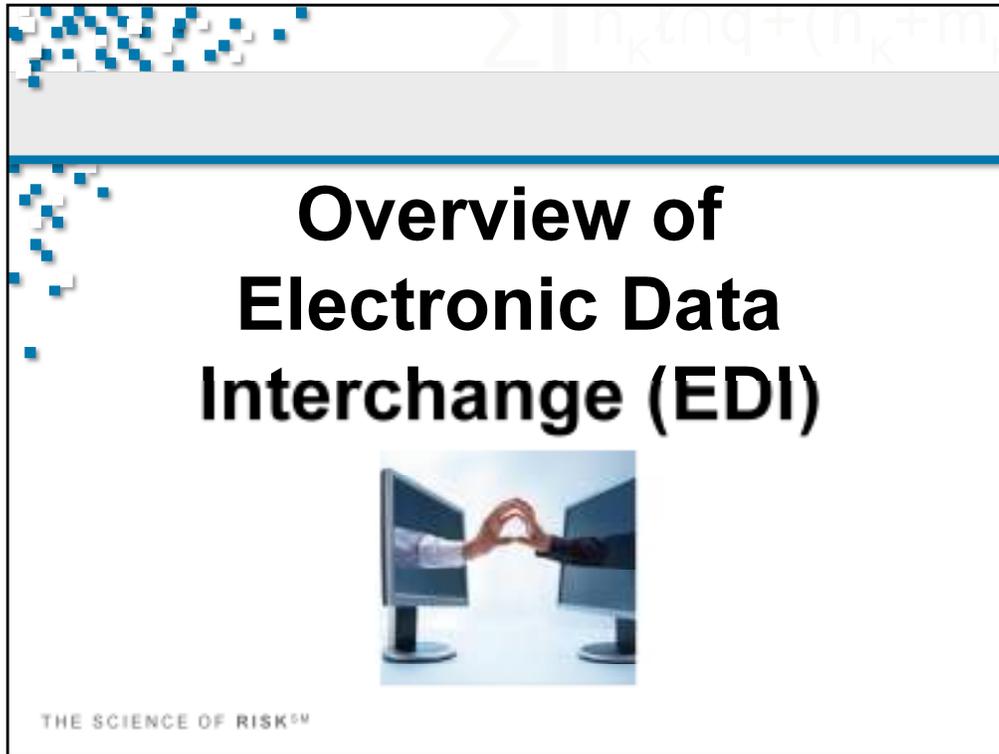

Presenters and Attendees

- **Louisiana Workforce Commission (LWC)**
 - Wes Hataway | Director, Office of Workers' Compensation Administration (OWCA)
 - Larry White | Deputy Director
 - Johnnie Perkins | Records Supervisor/EDI Coordinator
 - Andre de la Fuente | Manager
 - Carl Moore | Analyst
 - Gale Edwards | Analyst
 - Nadia Adolph | Analyst
- **Insurance Services Office, Inc. (ISO)**
 - Robbie Tanner | Director ISO State Solutions
 - Jim Eldridge | Director ISO Client Services

THE SCIENCE OF RISKSM

2

Welcome to the Louisiana Workforce Commission training. Introductions of presenters.

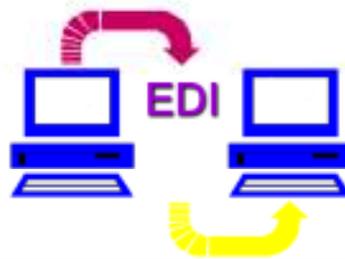

Overview of Electronic Data Interchange (EDI)

Overview of Electronic Data Interchange (EDI)

What is EDI?

Electronic Data Interchange (EDI) is the electronic exchange of data between *business* trading partners (i.e., claim administrators to state agencies), in a standardized format using a National Standard.

THE SCIENCE OF RISKSM

4

What is EDI? Electronic Data Interchange (EDI) is the electronic exchange of data between *business* trading partners (i.e., claim administrators to state agencies), in a standardized format using a National Standard.

Overview of Electronic Data Interchange (EDI)

Who is the International Association of Industrial Accident Boards and Commissions (IAIABC)?

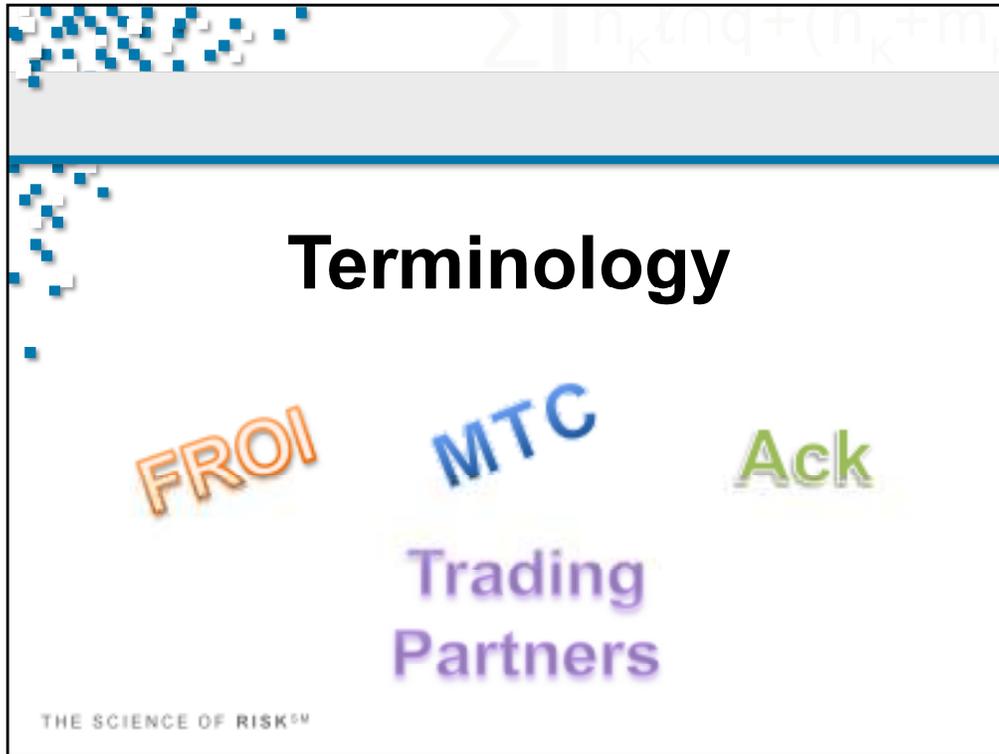

- The IAIABC is a not-for-profit trade association representing government agencies charged with the administration of workers' compensation systems throughout the United States, Canada, and other nations and territories.
- Founded in 1914, the IAIABC is the world's oldest trade association dedicated to promoting the advancement of workers' compensation systems throughout the world through education, research, and resource management. The theme "Find Information. Connect People." captures the heart of the association as it continues its mission through the twenty-first century.
- The mission of the IAIABC is to advance the efficiency and effectiveness of workers' compensation systems throughout the world.
- IAIABC Website: www.iaiaabc.org

THE SCIENCE OF RISK™

5

LWC is a jurisdictional member of the IAIABC.

Some EDI Terminology. Refer to the IAIABC Glossary for additional information.

What is a FROI?

First Report of Injury (FROI)

- A FROI is a record sent to the LWC to complete the First Report of Injury (FROI) requirements. Population of the record is dependent on the LWC's Element Requirement Table. Timeliness of the report is dependent on the LWC Event Table.
- A FROI contains information for example on the Claim Administrator, Employee, Employer, Accident information.

Reference lwcledi.info and www.iaiaabc.org for additional information.

What is a MTC?

MTC - Maintenance Type Code

- MTC's are used to report business events and communicate which type of FROI report is being submitted.

FROI MTC's that LWC accepts:

- FROI 00 = Original Report
- FROI 02 = Change Report
- FROI 04 = Denial Report
- FROI 01 = Cancellation Report
- FROI AU = Acquired/Unallocated
- FROI AQ = Acquired

Reference lwcledi.info and www.iaiaabc.org for additional information.

What is a Trading Partner?

- A Trading Partner is an entity that has entered into an agreement with LWC to exchange data electronically. An entity can be Claim Administrators, Insurance Companies, Third Party Administrators & Self Insured Entities

Reference lwcledi.info and www.iaiaabc.org for additional information.

What is an Acknowledgment?

Acknowledgment Record (ACK)

- An acknowledgment is a transaction (automated response) returned by LWC as a result of a FROI EDI report sent.
- It contains the data elements that identify the FROI report sent and communicates any technical and business issues or errors found with the FROI report.

Reference lwcledi.info and www.iaiaabc.org for additional information.

$$\sum_{k=1}^n n_k \ln q + (n_k + m_k)$$

Louisiana Workforce Commission EDI Initiative and Timelines

THE SCIENCE OF RISKSM

Louisiana Workforce Commission EDI Initiative and Timelines

LWC – EDI Initiative and Timelines

The Office of Workers' Compensation Administration is pleased to announce a new and better method for trading partners (insurers, self-insured employers, and claim administrators) to submit Employer Reports of Illness/Injury.

12

Louisiana Workforce Commission is moving towards the implementation of IAIABC Claims Release 3.0 reporting of First Report of Injury.

LWC – EDI Initiative and Timelines

- Beginning July 1, 2013, trading partners will have the option of submitting First Report of Injury (FROI) forms electronically.

Based on standards set by the International Association of Industrial Accident Boards and Commissions, this electronic form will improve accuracy and efficiency.

13

Louisiana Workforce Commission is moving towards the implementation of IAIABC Claims Release 3.0 reporting of First Report of Injury.

LWC – EDI Initiative and Timelines

- LWC will continue to accept Employer Reports of Injury/Illness forms submitted by mail on the LWC-WC-1007 until Dec. 31, 2013.

14

Louisiana Workforce Commission is moving towards the implementation of IAIABC Claims Release 3.0 reporting of First Report of Injury.

LWC – EDI Initiative and Timelines

- Beginning Jan. 1, 2014, the reporting of First Report of Injury (FROI) forms electronically will become mandatory.

15

Louisiana Workforce Commission is moving towards the implementation of IAIABC Claims Release 3.0 reporting of First Report of Injury.

Data Being Requested

THE SCIENCE OF RISKSM

Louisiana Workforce Commission - Data being requested

Data Being Requested

LWC is accepting IAIABC Release 3 First Report of Injury (FROI reports) as communicated on the LWC Event Table.

- An Event is a business circumstance that occurs in the life of a WC Claim which requires the reporting of EDI information to Louisiana.
-

FROI MTC's that LWC accepts:

FROI **00** = Original Report

FROI **02** = Change Report

FROI **04** = Denial Report

FROI **01** = Cancellation Report

FROI **AU** = Acquired/Unallocated

FROI **AQ** = Acquired

THE SCIENCE OF RISKSM

17

Events indicate the requirements for reporting including timing and specific report types.

For additional information concerning MTC reporting, see IAIABC Release 3 Implementation Guide SECTION 4: TRANSACTION SEQUENCING

Data Being Requested - FROI

**Establish a New Claim with
FROI MTC 00 Original**

Paper Equivalent	Comments	MTC	MTC Description	MTC Definition
LWC-WC-1A-1		00	Original	The original/initial first report transmitted between partners, including the re-transmission of a first report that was rejected due to a critical error.

THE SCIENCE OF RISKSM

18

SECTION 4: TRANSACTION SEQUENCING

Event 1. Business Event Group 1 Establish Claim or New Claim Administrator FROI

Event 1b. Report of Injury 00 Original-FROI The original/initial first report transmitted between partners, including the re-transmission of a first report that was rejected due to a critical error.

Data Being Requested - FROI

Denial of the Claim with FROI MTC 04 Denial.
Reporting a new claim while denying it in its entirety; or denying a previously reported claim in its entirety.

Paper Equivalent	Comments	MTC	MTC Description	MTC Definition
LWC-WC-1A-1		04	Denial	The entire claim is being denied.

THE SCIENCE OF RISKSM

19

SECTION 4: TRANSACTION SEQUENCING

Event 1. Business Event Group 1 Establish Claim or New Claim Administrator FROI

FROI Event 1c. Denial 04 Denial-FROI The entire claim is being denied.

Data Being Requested - FROI				
New Claim Administrator Taking Over the Claim with FROI MTC AQ Acquired Claim or MTC AU Acquired/Unallocated				
Paper Equivalent	Comments	MTC	MTC Description	MTC Definition
LWC-WC-1A-1		AQ	Acquired Claim	Minimal data sent to report that a new claim administrator has acquired the claim.
LWC-WC-1A-1		AU	Acquired/Unallocated	The equivalent of an initial first report (MTC 00) filed by a new claim administrator in response to an AQ transaction that has been rejected because of no claim match on database or when an AU is sent in lieu of an AQ based on the Jurisdiction's Event Table.

20

SECTION 4: TRANSACTION SEQUENCING

Event 1. Business Event Group 1 Establish Claim or New Claim Administrator FROI

FROI Event 1d. Acquired Claim (A new Claim Administrator is taking over the claim)

AQ Acquired Claim-FROI Minimal data sent to report that a new claim administrator has acquired the claim.

AU Acquired/Unallocated-FROI The equivalent of an initial first report (MTC 00) filed by a new claim administrator in response to an AQ transaction that has been rejected because of no claim match on database or when an AU is sent in lieu of an AQ based on the Jurisdiction's Event Table.

Data Being Requested - FROI

**Change a Claim with FROI MTC 02
Change**

Paper Equivalent	Comments	MTC	MTC Description	MTC Definition
LWC-WC-1A-1		02	Change	The claim administrator initiates a Change (02) MTC when it identifies a change in a data element designated on the Element Requirement Table.

THE SCIENCE OF RISKSM

21

SECTION 4: TRANSACTION SEQUENCING

Event 1. Business Event Group 1 Establish Claim or New Claim Administrator FROI

Changes:

02 Change- FROI The claim administrator initiates a Change MTC when it identifies a change in a data element designated on the Element Requirement Table.

Data Being Requested - FROI

**Cancel a Claim with FROI MTC 01
Cancel**

Paper Equivalent	Comments	MTC	MTC Description	MTC Definition
		01	Cancel	The original first report was sent in error.

THE SCIENCE OF RISKSM

22

SECTION 4: TRANSACTION SEQUENCING

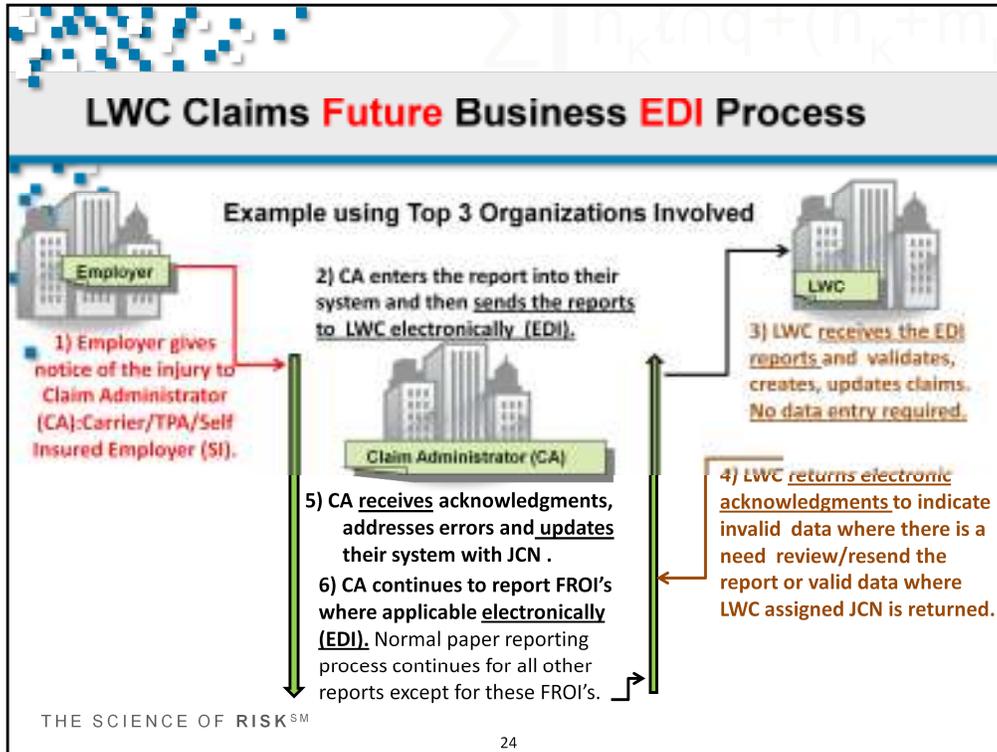

Event 1. Business Event Group 1 Establish Claim or New Claim Administrator FROI

Cancellations:

01 Cancel-FROI Claim was sent in error.

Louisiana Workforce Commission and Trading Partner EDI Business Process

LWC Claims Future Business EDI Process

This example provides the process between the Employer, the Claim Administrator (CA) and LWC.

- 1) Employer or the carrier/TPA gives notice of the injury to Claim Administrator (CA):Carrier/TPA/Self Insured Employer (SI)
- 2) CA reviews/enters into their system and sends the reports to LWC electronically (EDI)
- 3) LWC receives FROI data submitted by Claim Administrator, then automatically edits the data based on LWC EDI element requirement table, edit matrix and sequencing event table.
 - Initial FROI reports that pass all applicable edits are assigned a Jurisdiction Claim Number (JCN) and loaded in the LWC claims system as clean data.
 - All subsequent FROI reports that pass all applicable edits will be linked to the initial accepted FROI report by KEY Match Data fields, including JCN and loaded in the LWC Claim System.
- 4) Acknowledgements will also be automatically passed back to the CA as notification that their Transaction has been Accepted (TA) or Rejected (TR). LWC assigned JCN will be returned when a TA acknowledgment is received.
- 5) **CA receives acknowledgment and updates their system with JCN.**
- 6) **CA continues to report FROI's where applicable electronically (EDI).** Normal paper reporting process continues excluding these FROI's.

$\sum |n_k \ln q + (n_k + m_k)$

Options for EDI Submissions to Louisiana

THE SCIENCE OF RISKSM

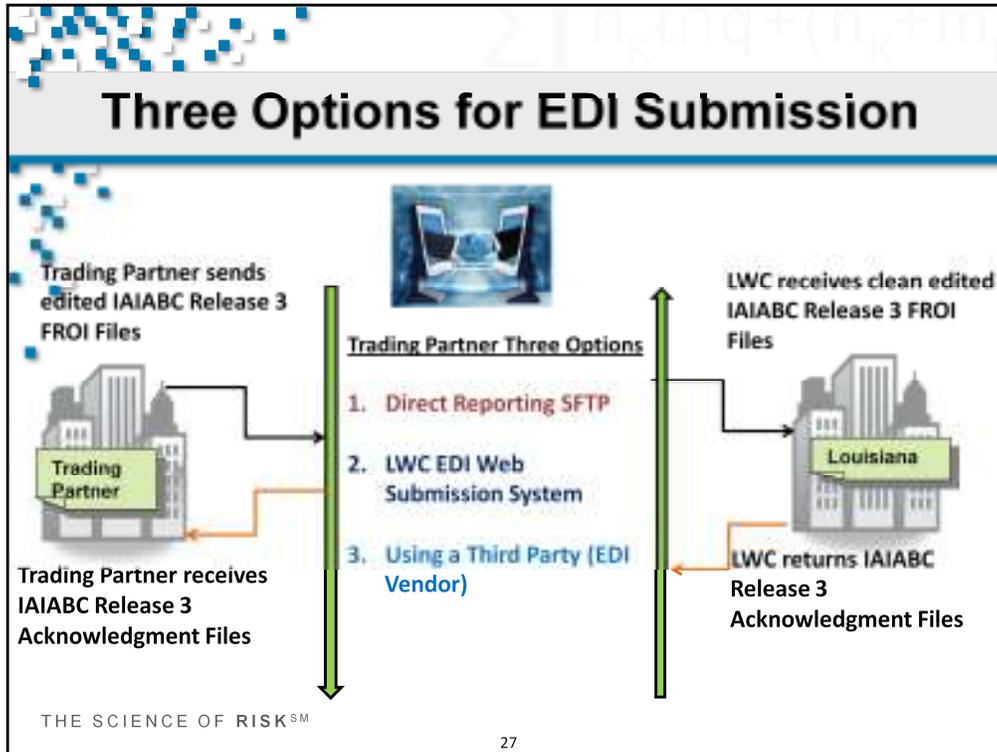

Louisiana Workforce Commission Options for EDI Submissions to Louisiana

Options for EDI Submissions

- Direct Reporting (Secure FTP)
- Third Party (EDI Vendor)
- LWC EDI Web Submission System

The 3 choices for EDI submissions are Direct Reporting (Secure FTP), Third Party (EDI Vendor) or Free LWC FROI Submission Web System (ISO wcPrism).

Trading Partners EDI Submission Options to LWC: There are three options for reporting IAIABC Claims Release 3 FROI to LWC and receiving the acknowledgments. The IAIABC Standards work in conjunction with LWC EDI Requirements posted on the website <http://www.lwcedi.info/>.

- 1) **Direct Reporting SFTP:** The Trading Partner has the ability and experience to create (using the IAIABC Standards and LWC Requirement Tables), edit and send via SFTP to LWC a clean edited IAIABC Release 3 FROI data and receive and process the IAIABC Claims Release 3 ACK's that LWC will return.
- 2) **LWC EDI Web Submission System (ISO wcPrism)** The Trading Partner is provided access to the LWC's FROI Submission Web System that provides the ability to enter and submit the claims to LWC and receive/present the acknowledgments.
- 3) **Third Party Vendor:** The Trading Partner utilizes a Third Party Vendor to assist with their EDI reporting. The Third Party Vendor would have options to assist with the EDI Submissions of clean edited IAIABC Release 3 FROI data and receive and process the IAIABC Claims Release 3 ACK's that LWC will return.

Third Party (Current EDI Vendors)

The Louisiana Third Party (EDI Vendor) list and contact information is located at www.lwcedi.info under EDI Vendors. The current list includes the following companies:

- CS Stars
- Ebix, Inc
- HealthTech, Inc
- Insurance Services Office, Inc (ISO)
- Mitchell Workers Compensation Solutions

Louisiana does not endorse, nor recommend any one EDI Vendor over another. To request to be a LWC EDI Vendor, please send an email to LWCEDI@lwc.la.gov.

A list of approved Third Party Vendors is located at www.lwcedi.info under EDI Vendors.

Element Requirements Table for FROI

The LWC FROI Element Requirements Table provides the LWC FROI business data element requirements. The Table defines the data element requirements for the FROI records to the Maintenance Type Code (MTC) level. Further, the Element Requirements Table provides data element requirements that differ based on Report Type (MTC) criteria established on the LWC Event Table.

Mandatory/Conditional and Expected/Conditional data elements are normally optional, but become mandatory under conditions established by the receiver. If the defined condition exists, the data element becomes mandatory and mandatory rules apply. The LWC FROI Conditional Data Element Table represents the LWC FROI data elements that are Mandatory/Conditional and Expected/Conditional and the conditions that apply.

Louisiana EDI Requirements Overview

THE SCIENCE OF RISKSM

Louisiana EDI Requirements Overview

Louisiana EDI Requirements Overview

- 
- Louisiana will implement EDI for Claims First Report of Injury (FROI) based on the IAIABC Claims Release 3 Standards

THE SCIENCE OF RISKSM

40

As we have discussed already today, LWC will implement EDI for Claims (First Report of Injury (FROI)) based on the IAIABC Claims Release 3 Standards. Please visit www.iaabc.org for additional information on the Release 3 standards.

Louisiana EDI Requirements Overview

Trading Partners must have a clear understanding of...

- What reports should be filed and when?
- What are the requirements on the data elements for these reports?
- *What are the specific edits that will be applied to the reports?*

THE SCIENCE OF RISKSM

41

To understand Louisiana EDI Requirements, Trading Partners must have a clear understanding of...

- What reports should be filed and when?
- What are the requirements on the data elements for these reports?
- *What are the specific edits that will be applied to the reports?*

Louisiana EDI Requirements Overview

Event Table

What reports should be filed and when?

- The LWC FROI Event Table provides information for a sender to understand the LWC EDI reporting requirements, what reports should be filed and when.
The Event Table relates EDI information to the circumstances under which the information is initiated as well as the timeframes for sending the information. These circumstances and timeframes reflect legislative mandates and specifications relative to reporting requirements based on various criteria.

Event Table: What reports should be filed and when? This is communicated on the Event Table.

Louisiana EDI Requirements Overview

Event Table

First Report of Injury (MTC 00) Event.

Maintenance Type		Event Rule			Report Trigger		When is the Report Due?		
Code	Description	Criteria	From	Thru	Criteria	Trigger Value	Value	Due Type	From
00	Original	3-EDI Voluntary Date	1-1-13	12-31-13	A-New Claim	Indemnity/Lost time claims. Indemnity is defined as more than 7 days of lost time . Medical Only and Incident Only FROI should also be sent, but there is no requirement to do so unless a SROI is required to be filed or if the LA OIWC requests.	10 Days	C - Calendar	C - Employer Notification
00	Original	2-EDI Mandate Date	1-1-14		A-New Claim	Indemnity/Lost time claims. Indemnity is defined as more than 7 days of lost time . Medical Only and Incident Only FROI should also be sent, but there is no requirement to do so unless a SROI is required to be filed or if the LA OIWC requests.	10 Days	C - Calendar	C - Employer Notification
00	Original	3-EDI Voluntary Date	1-1-13	12-31-13	Q-EE Death	Death Claims.	10 Days	C - Calendar	C - Employer Notification
00	Original	2-EDI Mandate Date	1-1-14		Q-EE Death	Death Claims.	10 Days	C - Calendar	C - Employer Notification

This is the LWC Event Table that shows the FROI 00 Original reporting requirements.

As you can see, there is an entry for voluntary period 1-1-13 through 12-31-13 and mandatory period starting 1-1-14.

There are 2 examples shown here 1) reporting Indemnity/Lost Time claims and 2) Death Claims.

We will walk through an example.

Louisiana EDI Requirements Overview

Event Table

Let's review an example of a First Report of Injury (MTC 00) report requirement.

This is just one example. All MTC's on the Event Table are read the same way.

Event Table

Event Table: Voluntary Period

Louisiana allows submission of a *FROI 00*

for new claims on or after

January 1, 2013 through

December 31, 2013

Release	Report Type	Maintenance Type		Event Rule		
		Code	Description	Criteria	From	Thru
R3	FROI	00	Original	3 - EDI Voluntary Date	1-1-13	12-31-13

45

Event Table example for FROI 00 - Original: Voluntary Period

Louisiana allows the submission of a *FROI 00* for new claims on or after January 1, 2013 through December 31, 2013.

Event Table

- Event Table: Mandatory Period - ongoing
Louisiana requires submission of a *FROI 00*

for new claims on or after the
January 1, 2014

Release	Report Type	Maintenance Type		Event Rule		
		Code	Description	Criteria	From	Thru
R3	FROI	00	Original	2=EDI Mandate Date	1-1-14	

Event Table example for FROI 00 - Original: Mandatory Period

Louisiana requires the submission of a *FROI 00* for new claims on or after 1-1-14 and ongoing.

Event Table

The FROI MTC 00 Original report must be sent for indemnity/lost time claims based in the Report Trigger Value.

Report Trigger		When is the Report Due?			Paper Form(s)	Receiver
Criteria	Trigger Value	Value	Due Type	From		
A-New Claim	Indemnity/Lost time claims. Indemnity is defined as more than 7 days of lost time . Medical Only and Incident Only FROI should also be sent, but there is no requirement to do so unless a SROI is required to be filed or if the LA OWC requests.	10 Days	C - Calendar	C - Employer Notification	LWC-WC-1A-1	

Event Table example for FROI 00 - Original:

The FROI MTC 00 Original report must be sent for indemnity/lost time claims based in the Report Trigger Value.

Indemnity is defined as more than 7 days of lost time. Medical Only and Incident Only FROI should also be sent, but there is no requirement to do so unless a SROI is required to be filed or if the LA OWC requests.

Event Table

The FROI MTC 00 Original report must be received by LWC within 10 calendar days from the Employer Notification

Report Trigger		When is the Report Due?		
Criteria	Trigger Value	Value	Due Type	From
A-New Claim	Indemnity/Lost time claims. Indemnity is defined as more than 7 days of lost time . Medical Only and Incident Only FROI should also be sent, but there is no requirement to do so unless a SROI is required to be filed or if the LA OWC requests.	10 Days	C - Calendar	C - Employer Notification

THE SCIENCE OF RISKSM

48

Event Table example for FROI 00 - Original:

The FROI MTC 00 Original report must be received by LWC within 10 calendar days from the Employer Notification

Louisiana EDI Requirements Overview

Element Requirement Table

What are the requirements on the data elements for the reports?

- The Element Requirements Table provides FROI data element requirements and communicates how the data element requirements differ for the Report Types (MTC).

There are some data elements that will have edits applied that will make them mandatory under certain conditions. If the defined condition exists, the data element becomes mandatory and mandatory rules apply.

Element Requirement Table: What are the requirements on the data elements for these reports?

Element Requirements

The Element Requirement Table contains **2 worksheets**:

- FROI Element Requirements
- FROI Conditions (for MC Requirement Codes)

THE SCIENCE OF RISKSM

The LWC FROI Element Requirement Table contains **2 worksheets**.

- FROI Element Requirements
- FROI Conditions (for MC's)

Element Requirements

Data Element requirements are defined for each FROI Maintenance Type Code (MTC) on the LWC Element Requirement Table.

THE SCIENCE OF RISKSM

Data Element requirements are defined for each FROI Maintenance Type Code (MTC) on the LWC Element Requirement Table.

Element Requirements

Requirement Codes are used to express the requirement severity for each data element and report type (FROI MTC).

Examples:

- F-Fatal, M-Mandatory, MC-Mandatory Conditional: if edits fail will result in TR (Transaction Rejected) acknowledgment.
- IA-If Available/Applicable: if the data is sent and is invalid, the acknowledgment will result in a TA (transaction accepted) acknowledgment.

THE SCIENCE OF RISKSM

Requirement Codes are used to express the requirement severity for each data element and report type (FROI MTC).

Examples:

For F-Fatal, M-Mandatory, MC-Mandatory Conditional, if the data fails the edits, a TR (Transaction Rejected) will be returned in the acknowledgment.

IA-If Available/Applicable, if the data is sent and is invalid, the acknowledgment will result in a TA (transaction accepted) acknowledgment.

Element Requirements

Each MTC and Data Element has a Requirement Code assigned. This example shows F: Fatal and M: Mandatory. Both will cause the transactions to be rejected if the data elements are missing or invalid.

DN#	DATA ELEMENT NAME	FROI MTC'S				
		00	01	04	AQ	CO
<i>Partial Display of FIRST REPORT OF INJURY (FROI)</i>						
0015	Claim Administrator Claim Number (Key Match)	F	F	F	F	F
0016	Employer FEIN	M	M		M	\$
0021	Employer Physical City	M	M		M	\$
0022	Employer Physical State Code	M	M		M	\$
0023	Employer Physical Postal Code	M	M		M	\$

THE SCIENCE OF RISKSM

53

On the LWC Element Requirement Table, each MTC and Data Element has a Requirement Code assigned. This example shows F: Fatal for Claim Administrator Claim Number and M: Mandatory for the Employer FEIN, Physical City, State Code and Postal Code. As we discussed, for F and M requirement codes, the transactions will be rejected if the data elements are missing or invalid.

Element Requirements

Data elements that have *Conditions* that make them mandatory are indicated with the *MC* requirement code.

DN#	DATA ELEMENT NAME	FROI MTC'S				
		00	01	04	AQ	CO
<i>Partial Display of FIRST REPORT OF INJURY (FROI)</i>						
0015	Claim Administrator Claim Number (Key Match)	F	F	F	F	F
0016	Employer FEIN			MC		\$
0021	Employer Physical City			MC		\$
0022	Employer Physical State Code			MC		\$
0023	Employer Physical Postal Code			MC		\$

THE SCIENCE OF RISK™

54

Data elements that have *Conditions* that make them mandatory are indicated with the *MC* requirement code.

Element Requirements-Conditions

Conditions are defined on a separate table:

- Conditional Requirement Code
- Data Element # and Name
- Business Condition(s)
- Technical Condition(s)

FROI DATA ELEMENT				
Req Code	DN#	DATA ELEMENT NAME	BUSINESS CONDITION(S)	TECHNICAL CONDITION(S)
MC	0016	Employer FEIN	For Maintenance Type Code (MTC DN0002) 04 Denial, mandatory if Full Denial Reason Code (DN0198) not = 3E (No Coverage - No policy in effect on the date of accident) or 3D (No Coverage - No jurisdiction).	For Maintenance Type Code (MTC DN0002) 04 Denial, if Full Denial Reason Code (DN0198) not = 3E or 3D, then mandatory.

Element Requirements-Conditions

Example: For MTC 04 Denial, the DN0016 Employer FEIN is mandatory except when Full Denial Reason code contains the value of 3E or 3D. The Requirement Code = MC and the condition makes Employer FEIN mandatory.

FROI DATA ELEMENT				
Req Code	DN#	DATA ELEMENT NAME	BUSINESS CONDITION(S)	TECHNICAL CONDITION(S)
MC	0016	Employer FEIN	For Maintenance Type Code (MTC DN0002) 04 Denial, mandatory if Full Denial Reason Code (DN0198) not = 3E (No Coverage - No policy in effect on the date of accident) or 3D (No Coverage - No jurisdiction).	For Maintenance Type Code (MTC DN0002) 04 Denial, if Full Denial Reason Code (DN0198) not = 3E or 3D, then mandatory.

Element Requirement Table example: For MTC 04 Denial, the DN0016 Employer FEIN is mandatory except when Full Denial Reason code contains the value of 3E or 3D. The Requirement Code = MC and the condition makes Employer FEIN mandatory under this condition. If an error is identified with Employer FEIN based on this conditional edit, the acknowledgment will indicate that the transaction is rejected with a TR acknowledgment code.

Louisiana EDI Requirements Overview

Edit Matrix

What are the specific edits that will be applied to the reports?

- The LWC Edit Matrix, based on the LWC Element Requirement Table, conveys which data elements have edits that may be applied to them and provides the standard error messages associated with these edits.

The Edit Matrix details the edits applied by a Louisiana.

Edit Matrix : What are the specific edits that will be applied to the reports?

Release 3 Edit Matrix

The Edit Matrix is made up of the following tables:

1. **DN-Error Message** contains “standard” editing developed for Release 3 data elements.
2. **Value Table** expresses the jurisdiction’s acceptable code values.
3. **Match Data** describes the data elements that will be used to determine if the report will create a new claim or find an existing claim or transaction in the jurisdiction’s database.
4. **Population Restrictions** contains the jurisdiction’s restrictions applied to the data element(s).
5. **Sequencing Table** conveys the sequencing rules that clarify how LWC will apply Edit 063 - Invalid Event Sequence.

As we discussed earlier the Edit Matrix is made up of the following tables.

1. **DN-Error Message** contains “standard” editing developed for Release 3 data elements.
2. **Value Table** expresses the jurisdiction’s acceptable code values for data elements that contain actual code list.
3. **Match Data** describes the data elements that will be used to determine if the report will create a new claim or find an existing claim or transaction in the jurisdiction’s database. These fields are have either Fatal or Mandatory or Mandatory Conditional Requirement Codes.
4. **Population Restrictions** contains the jurisdiction’s restrictions applied to the data element(s). It allows LWC to further define and communicate edits specific to LWC.
5. **Sequencing Table** provides information on the order or sequence that a FROI MTC can be submitted to LWC. For the reports that are not sent in the correct order LWC will return a TR (Transaction Rejected) acknowledgment with error Edit 063 - Invalid Event Sequence.

Now let’s look at examples of how the information is presented on these tables and how they can be used to understand LWC’s FROI requirements.

The tables are listed and available separately on the Louisiana EDI Website: www.lwcedi.info.

DN Error Message Table

Release 3 Data Element Numbers and Names are listed down the left columns.

DN	IAIABC Data Element Name	0000	0001	0002	0003	0004	0005	0006	0007	0008	0009	0010	0011
0000	Entire Batch												
0001	Transaction Set ID												
0002	Maintenance Type Code												
0003	Maintenance Type Code Date												
0004	Jurisdiction Code												
0005	Jurisdiction Claim Number												
0006	Insurer FEIN												
0007	Insurer Name												

Contains standard editing.

On the DN Error Message Table, Release 3 Data Element Numbers and Names are listed down the left columns.

DN Error Message Table

Error Message Numbers and associated descriptions are listed across the top of the table.

Error Message Number	Description	Field	Table	Condition	Severity	Message
001	Mandatory field not present					
018	Number of Days Worked must be 0-7	018				
019	Days must be 0-6	019				
028	All digits must be 0-9	028				
029	Must be a valid date (CCYYMMDD)	029				
030	Must be A-Z, 0-9, or spaces	030				
031	Must be a valid time	031				
033	Must be <= Date of Injury	033				
034	Must be >= Date of Injury	034				

On the DN Error Message Table, Error Message Numbers and associated descriptions are listed across the top of the table.

DN Error Message Table

When there is a Y in the Jurisdiction will apply edit column, this indicates that that specific edit will be applied to the data element.

Required postscript code per msg 001 and 002	Jurisdiction will apply edit?	Population Restriction Indicator	001 Mandatory field not present	018 Number of Days Worked must be 0-7	019 Corps must be 0-6	028 All digits must be 0-9	029 Must be a valid state (CCYMMCSO)	030 Must be A-Z, 0-9, or space	031 Must be available	032 Must be a Date of Birth	033 Must be in State of Maryland	034 Must be a valid Data Quality Flag	035 Must be a Restriction Code of Death	036 Must be a Migration Type Code Value	037 Must be a valid State	038 The MVA is not null	039 All digits cannot be the same	040 Must be a valid date
001	Y	L																
002	Y	L																
003	Y	L																
004	Y	L																
005	Y	L																
006	Y	L																
007	Y	L																
008	Y	L																
009	Y	L																
010	Y	L																
011	Y	L																
012	Y	L																
013	Y	L																
014	Y	L																
015	Y	L																
016	Y	L																
017	Y	L																
018	Y	L																
019	Y	L																
020	Y	L																
021	Y	L																
022	Y	L																
023	Y	L																
024	Y	L																
025	Y	L																
026	Y	L																
027	Y	L																
028	Y	L																
029	Y	L																
030	Y	L																
031	Y	L																
032	Y	L																
033	Y	L																
034	Y	L																
035	Y	L																
036	Y	L																
037	Y	L																
038	Y	L																
039	Y	L																
040	Y	L																

On the DN Error Message Table, when there is a Y in the Jurisdiction will apply edit column, this indicates that specific edits will be applied to the data element.

DN Error Message Table

If 'Y' is in the Jurisdiction will apply edit column and 'L' is grayed out, in this case Edit 029 is grayed, this indicates that the edit will not be applied to the specific data element. All other non grayed 'L' edits for the data element will be applied, in this case 001 will be applied.

If 'N' is in the Jurisdiction will apply edit column, this indicates that there will be no edits applied to the data element at all.

The screenshot shows a table with columns for 'Required requirement code (or msg 001 and 308)', 'Jurisdiction will apply edit?', 'Population Restrictions Indicator', and various error codes (001, 019, 029, 028, 025). The table also includes a 'Data Element Name' column. Red arrows point from the explanatory text to the 'Jurisdiction will apply edit?' column and the '029' error code cell.

Required requirement code (or msg 001 and 308)	Jurisdiction will apply edit?	Population Restrictions Indicator	001 Mandatory field not present	019 Number of Days Worked must be 0-7	028 AN edit must be 0-8	029 Must be a valid AM (CCY/M/MCO)	025	024	023	022	021	020	019	018	017	016	015	014	013	012	011	010	009	008	007	006	005	004	003	002	001
001	Y	L																													
029	N	L																													

On the DN Error Message Table, the way it is communicated whether LWC will apply this edit is the indication of an L (greyed or not greyed) in the corresponding box for the error on the matrix in the conjunction with the 'Jurisdiction will apply edit' Y or N indication.

If 'Y' is in the Jurisdiction will apply edit column and 'L' is grayed out, in this case Edit 029 is grayed, this indicates that the edit will not be applied to the specific data element. All other non grayed 'L' edits for the data element will be applied, in this case 001 will be applied.

If 'N' is in the Jurisdiction will apply edit column, this indicates that there will be no edits applied to the data element at all. In this case, no L's would need to be greyed because of the N indication that Jurisdiction will not apply the edits.

Valid Value Table

This table reflects the FROI codes accepted for each data element. LWC will accept the values that are not grayed out when the 'capture' column contains a 'Y'.
 Example: FROI Maintenance Type Codes (MTC's) accepted are: 00,01,02,04,AQ,AU.

DN	Element Name	Capture?	Acceptable Code Value List - grayed out indi																	
0002	Maintenance Type Code (for FROI)	Y	00	01	02	04	00	AQ	AU	UI	UR									
0002	Maintenance Type Code (for SROI)	N	00	01	02	04	00	CA	CB	CC	CD	CE	CF	CG	CH	CI	CL	CM	CN	CO
	Maintenance Type Codes (for SROI continued)	N	RB	RE	S1	S2	S3	S4	S5	S6	S7	S8								
0039	Initial Treatment Code	N	0	1	2	3	4	5												
0053	Employee Gender Code	Y	F	M	U															
0054	Employee Marital Status Code	N	U	M	S	K														
0058	Employment Status Code	Y	C	9	0	A	B	1	2	3	0	4								
0063	Wage Period Code (FROI)	Y	01	02	04	06	07													
0063	Wage Period Code (SROI)	N	01	04																
0069	Pre-Existing Disability Code	N	Y	N	U															
0073	Claim Status Code	Y	O	C	R	X														
0074	Claim Type Code	Y	M	I	N	B	L													
0075	Agreement to Compensate Code	N	W	L																

The Valid Value Table reflects the FROI codes accepted for each data element. LWC will accept the values that are not grayed out when the 'capture' column contains a 'Y'.

Example: FROI Maintenance Type Codes (MTC's) accepted are: 00,01,02,04,AQ,AU.

Match Data

For claims processing, Louisiana's primary "match" data element values are identified by 'P' for New Claims and Existing Claims.

GROUPING	DN	DATA ELEMENT NAME	New Claims	Existing Claims	Corrections-NA
Claim	0004	Jurisdiction Code	S		
	0005	Jurisdiction Claim Number		P	
	0015	Claim Administrator Claim Number	P		
Claimant		Employee ID	P		
		§ Employee SSN - Preferred (DN0042)	P	S	
		§ Employee ID Assigned by Jurisdiction (DN0154)	P	S	
	0031	Date of Injury	P	S	
	0043	Employee Last Name	P	S	
Claim Administrator	0044	Employee First Name	P	S	
	0187	Claim Administrator FEIN *	P	S	
Insurer	0014	Claim Administrator Postal Code *	P	S	
Transaction	0006	Insurer FEIN	P		
	0002	Maintenance Type Code		P	
	0003	Maintenance Type Code Date		P	
	*	Not utilized on MTC AQ/AU as they change on the acquiring report.			
	**	Refer IAABC Release 3 Error Correction Technical Rules in Section 4			

The LWC Match Data is used to identify a transaction as a new claim, to create or "match" to an existing claim for duplicate checking, updating and processing. On a specific claim, a primary "match" data element value may or can change and prevent a match. For this reason, LWC has identified primary "match" data element(s) and secondary "match" data elements.

This example shows the Primary Match Data elements indicated by 'P'.

Match Data

When there is no match on the primary match data, secondary "match" data elements, indicated by 'S' may find the claim.

GROUPING	DN	DATA ELEMENT NAME	New Claims	Existing Claims	Corrections-NA
Claim	0004	Jurisdiction Code	S	S	
	0005	Jurisdiction Claim Number	P	P	
	0015	Claim Administrator Claim Number	P	S	
Claimant		Employee ID		S	
		§ Employee SSN - Preferred (DN0042)	P	S	
		§ Employee ID Assigned by Jurisdiction (DN0154)	P	S	
	0031	Date of Injury	P	S	
	0043	Employee Last Name	P	S	
	0044	Employee First Name	P	S	
Claim Administrator	0187	Claim Administrator FEIN *	P	S	
Insurer	0006	Insurer FEIN	P	S	
Transaction	0002	Maintenance Type Code			
	0003	Maintenance Type Code Date		P	
	*	<i>Not utilized on MTC AQ/AU as they change on the acquiring report.</i>			
	**	Refer IAABC Release 3 Error Correction Technical Rules in Section 4			

When there is no match on the primary match data, secondary "match" data elements, indicated by 'S' may find the claim. This example shows the Secondary Match Data elements indicated by 'S'.

Population Restrictions

Where “P” exists in the Restrictions Indicator column of the *DN-Error Message* table, there should be a corresponding entry in the Populations Restrictions table.

Edit Matrix Population Legend:
 E = Edit applies to the data elements deemed essential for a jurisdiction's transaction to be processed.
 L = Edit applies to the data elements based on the requirements indicated on the Element Requirement Table.
Applicable to Jurisdiction's Requirements:
 F = Essential data element; must be edited for successful transaction processing.
 Y = Yes - indicates that all edits marked for the data element will be applied, some may be based on conditions defined in the Element Requirement Table.
 N = No - indicates that all edits marked for the data element will not be applied.

For Population Restrictions:
 For Data Elements that have certain 'population values' allowed for specific data elements, a "P" is indicated in the 'Population Restrictions Indicator' column and the associated data element population restriction is detailed in the Population Restrictions Table.

Population Restrictions Indicator

DN	SAHRC Data Element Name	Population Restrictions Indicator
0016	Employer FEIN	P
0017	Insured Name	

Partial Display of DN-Error Message table

To understand the Population Restrictions table, first refer to the Edit Matrix – DN Error Message table.

If you see a “P” in the Population Restrictions Indicator column of the *DN-Error Message* table, there should be a corresponding entry in the Populations Restrictions table.

Population Restrictions

**Each *Population Restriction* contains:
The DN # and Name;**

DN	Data Element Name	Population Restriction	Error Message Number	Error Message Text	Element Error Text
0006	Maintenance Type Code	Values that are not accepted are FROEDD, 05, 08 and all 0800 MTC's.	042	Not statistically valid	Refer to LWC Edit Matrix for valid values
0077	Late Reason Code	Values that are not accepted are 15, 16, 17, 49	042	Not statistically valid	Refer to LWC Edit Matrix for valid values
0178	Employee ID Type Qualifier	Values that are not accepted are S, S, P	042	Not statistically valid	Refer to LWC Edit Matrix for valid values
0234	Number of Accident/Injury Description Narratives	Value must be greater than zero when MTC = 00, 04, AD and associated 02.	045	Value is \leq required by jurisdiction	Refer to LWC Edit Matrix for population restrictions
0176	Number of Denial Reason Narratives	Value must be greater than zero when MTC = 04 and DN0277 (Number of Full Denial Reason Codes) equal zero	045	Value is \leq required by jurisdiction	Refer to LWC Edit Matrix for population restrictions
0177	Number of Full Denial Reason Codes	Value must be greater than zero when MTC = 04 and DN0276 (Number of Denial Reason Narratives) equal zero	045	Value is \leq required by jurisdiction	Refer to LWC Edit Matrix for population restrictions
0060	Maintenance Type Code Date	Must be greater than or equal to MTC Date of last MTC Report that is in TA acknowledgment status.	064	Invalid data relationship	Must be \geq last MTC Date for Rep in TA ack status
0015	Claim Administrator Claim Number	Claim Administrator Claim Number on the companion record does not match the Claim Administrator Claim Number on the base transaction, the transaction (148/921).	064	Invalid data relationship	Refer to IMAHC Release 3 System Rules
0105	Interchange Version ID	Interchange Version ID (Transaction Type Code) of the HD0 must correspond to the Transaction Set ID. (See Acknowledgment Scenario #6: Validate Batch Integrity)	064	Invalid data relationship	Refer to IMAHC Release 3 System Rules

The LWC FROI Population Restrictions Table elaborates on the data elements specific 'data' population or accepted values. Each entry contains the Data Element Number (DN#) and data element name.

Population Restrictions

Each *Population Restriction* contains:
Population Restriction, Error Message Number, Error Message Text and Element Error Text

DN	Data Element Name	Population Restriction	Error Message Number	Error Message Text	Element Error Text
0002	Maintenance Type Code	Values that are not accepted are PR02-CO, 03, 04 and 05	042	Not statutorily valid	Refer to LWC SDR Matrix for valid values
0077	Late Reason Code	Values that are not accepted are L3, L6, L7, S3	043	Not statutorily valid	Refer to LWC SDR Matrix for valid values
0270	Employee ID Type Qualifier	Values that are not accepted are E, G, P	043	Not statutorily valid	Refer to LWC SDR Matrix for valid values
0278	Number of Accident/Injury Description Narratives	Value must be greater than zero when MTC = 00, 04, A0 and associated 02.	045	Value is < required by jurisdiction	Refer to LWC SDR Matrix for population restrictions
0276	Number of Denial Reason Narratives	Value must be greater than zero when MTC = 04 and DN0077 (Number of Full Denial Reason Codes) equal zero	045	Value is < required by jurisdiction	Refer to LWC SDR Matrix for population restrictions
0277	Number of Full Denial Reason Codes	Value must be greater than zero when MTC = 04 and DN0276 (Number of Denial Reason Narratives) equal zero	045	Value is < required by jurisdiction	Refer to LWC SDR Matrix for population restrictions
0003	Maintenance Type Code Date	Must be greater than or equal to MTC Date of last MTC Report that is in TA acknowledgment status.	004	Invalid date relationship	Must be --last MTC Date for Rpt In TA ack status
0015	Claim Administrator Claim Number	Claim Administrator Claim Number on the companion record does not match the Claim Administrator Claim Number on the base transaction, the transaction [146/0211].	004	Invalid date relationship	Refer to UWABC Release 3 System Rules
0005	Interchange Version ID	Interchange Version ID (Transaction Type Code) of the RDI must correspond to the Transaction Set ID. (See Acknowledgment Scenario #8: Validate Batch Integrity)	004	Invalid date relationship	Refer to UWABC Release 3 System Rules

The Population Restrictions Table communicates the Population Restriction, Error Message Number, Error Message Text and Element Error Text.

The Population Restriction column in the table is used to indicate the specific reason for the generation of the error messages, including MTC limitation, if applicable. As you can see, the 'Population Restriction' listed for each Data Element on this table is associated with a specific Error Message.

Example DN0270 Employee ID Type Qualifier values that are not accepted are E, G, P and if sent an error of 042 Not Statutorily Valid will be returned.

Sequencing Table

Louisiana's transaction sequencing edits are defined on the *Sequencing table*. If the sequencing edits fail then error **063 - Invalid Event Sequence** will be returned in the TR (Transaction Rejected) acknowledgment.

Apply Seq Edit? Y, N, NA	Incoming MTC	MTC NAME	Default Error Number (DNBR)	Suggested Error Text (DSGT)	MINIMUM SEQUENCING REQUIREMENTS
Business Event Group I: Establish Claim or New Claim Administrator					
		1a. Determination not made			
NA	00 - FRI	Under Investigation FRI			None (refer to FRI Match Data/Duplicate Transactions: TRANSACTION PROCESSING GUIDELINES in Section 2)
		1b. Report of Injury			
Y	00	Original	003	Check Match Data for Possible Duplicate	None (refer to FRI Match Data/Duplicate Transactions: TRANSACTION PROCESSING GUIDELINES in Section 2)
		1c. Denial			
Y	04 - FRI	Full Denial FRI	003	Check Match Data for Possible Duplicate	None (refer to FRI Match Data/Duplicate Transactions: TRANSACTION PROCESSING GUIDELINES in Section 2)
		1d. Accepted Claim			
Y	A0	Required Claim	003	No previous FRI from prior Claim Admin accepted	No previous accepted First Report from prior Claim Administrator
Y	A0	Required/Unallocated	003	Check Match Data for Possible Duplicate	None (refer to FRI Match Data/Duplicate Transactions: TRANSACTION PROCESSING GUIDELINES in Section 2)

The Sequencing Table contains LWC's MTC types accepted and indicates the order or sequence that they can be sent. These are the sequence in which business events (MTCs) typically occur during the life of a claim.

Louisiana's transaction sequencing edits are defined here on the *Sequencing table*. If the sequencing edits fail then error **063 - Invalid Event Sequence** will be returned in the TR (Transaction Rejected) acknowledgment.

Sequencing Table

The value of 'Y' in the 'Apply Seq Edit' column indicates the edit 063 will be applied. Example FROI 00, 04, AQ, AU.
 The value of 'NA' in the 'Apply Seq Edit' column indicates edit 063 will not be applied. Example FROI UI.

Apply Seq Edit Y, N, NA	Incoming MTC	MTC NAME	Event Error Number (ENR)	Suggested Error Text (ENR)	MINIMUM SEQUENCING REQUIREMENTS
Business Event Group 1: Establish Claim or New Claim Administrator					
		1a. Determination not made			
NA	IS - FROI	Under Investigation FROI			Note (refer to FROI Match Data/Duplicate Transactions TRANSACTION PROCESSING GUIDELINES in Section 2)
		1b. Report of Injury			
Y	08	Original	803	Check Match Data for Possible Duplicate	Note (refer to FROI Match Data/Duplicate Transactions TRANSACTION PROCESSING GUIDELINES in Section 2)
		1c. Denial			
Y	04 - FROI	Full Denial FROI	803	Check Match Data for Possible Duplicate	Note (refer to FROI Match Data/Duplicate Transactions TRANSACTION PROCESSING GUIDELINES in Section 2)
		1d. Accepted Claim			
Y	AQ	Required Claim	803	No previous FROI from prior Claim Admin accepted	No previous accepted First Report from prior Claim Administrator
Y	AU	Required/Unallocated	803	Check Match Data for Possible Duplicate	Note (refer to FROI Match Data/Duplicate Transactions TRANSACTION PROCESSING GUIDELINES in Section 2)

Refer to the 'Apply Seq Edit' column.

When the value of 'Y' is in the 'Apply Seq Edit' column, this indicates that edit 063 will be applied. Example FROI 00, 04, AQ, AU.

The value of 'NA' in the 'Apply Seq Edit' column indicates edit 063 will not be applied. Example FROI UI.

Louisiana – Test Plan Overview

FROI Testing

MTC 00, 04, 01, 02. Also, MTC AQ and AU if applicable.

- Production Approval: Submission of FROI MTC reports indicated (real or mock claims) that receive TA (Transaction Accepted) Acknowledgment Status. Successful receipt and processing of the acknowledgment.

All trading partners must be approved individually or through a vendor prior to filing release 3.0 reports in production.

Note: Vendors are allowed to test once to approve all of their supported LWC Trading Partners for each applicable application. All trading partners must be approved individually or through a vendor prior to filing release 3.0 reports in production.

THE SCIENCE OF RISKSM

73

The LWC release 3.0 test plan:

FROI Testing

MTC 00, 04, 01, 02. Also, MTC AQ and AU if applicable.

Production Approval: Submission of FROI MTC reports indicated (real or dummy claims) that receive TA (Transaction Accepted) Acknowledgment Status.

All Trading Partners will also be required to complete the published release 3.0 test plan to verify their ability to file electronically with LWC prior to the release 3.0 implementation date.

If your organization is currently or is planning to file Release 3.0 FROI reports through an approved EDI vendor to Louisiana, the vendor will be required to complete the test plan once on behalf of all their clients. Once the vendor is approved for production, your organization will also be approved for production as well.

All trading partners must be approved individually or through a vendor prior to filing release 3.0 reports in production.

How do I get help?

All questions related to LWC's FROI EDI Requirements or the Trading Partner Registration Process or General EDI Support should be sent to LWCEDI@lwc.la.gov

THE SCIENCE OF RISKSM

75

This concludes the Louisiana EDI Training session for today. Please visit us online for additional information.

Louisiana Workforce Commission would like to thank you for your attendance today and look forward to working with you on the implementation of EDI reporting of First Report of Injury in Louisiana.

Thank you again and have a wonderful afternoon.
